In this folder you will find:

- Logo in EPS format: is sometimes (not always) required when printing apparel or clothing.
- CMYK: to be used ONLY ON PRINTED MATERIAL.
- RGB: to be used ONLY ON DIGITAL MATERIAL.

- ***Logo NO slogan:*** recommended to be used on small format; such as: t-shirts, pens, website menu, social media (sometimes),

In this folder you will find:

- Logo in EPS format: is sometimes (not always) required when printing apparel or clothing.
- CMYK: to be used ONLY ON PRINTED MATERIAL.
- RGB: to be used ONLY ON DIGITAL MATERIAL.

CMYK & RGB logo values

CMYK is used for print products, while RGB color mode is best for digital work

- **CMYK:** use CMYK for any project design that will be physically printed, not viewed on a screen. If you need to recreate your design with ink or paint, the CMYK color mode will give you more accurate results. You can use it for:
 - Branding: business cards, stationary, stickers, signs & storefronts
 - Advertising: billboards, posters, flyers, vehicle wraps, brochures
 - Merchandise: T-shirts, hats and other branded clothing, promotional swag (pens, mugs, etc.),
 - Essential print materials: product packaging, etc.
- **RGB:** if the end destination of your design project is a digital screen, use the RGB color mode. This would go for anything that involves computers, smartphones, tablets, TVs, cameras, etc. You can use it for:
 - Web & app design: icons, buttons, graphics
 - Branding: online logos & ads
 - Social media: images for posts, profile pictures, profile backgrounds
 - Visual content: video, digital graphics, infographics, photographs for websites, social media, or apps

CMYK & RGB logo values

- **CMYK:**

C: 0% **M:** 95% **Y:** 90% **K:** 0%

HEX CMYK#: ee302f

- **RGB:**

R: 225% **G:** 22 % **B:** 22%

HEX RGB#: ff1616

HEX #: Hex colors provide a standardized way to communicate colors across different platforms and devices. Since they use a combination of letters and numbers, they can be easily understood by designers and developers, globally ensuring the basic colors of your design carry through.
